EDUCATION

FPT University (2022 - 2026)

Software Engineering

GPA: 8.54/10

CORE SKILLS

- **Cloud Platform: AWS (EC2, S3, RDS, DynamoDB, VPC, IAM, KMS, Amazon Bedrock)**
- **DevOps & Automation: Terraform (IaC), Docker, Kubernetes (K8s), CI/CD Workflow.**
- **Observability & Security: AWS CloudWatch, CloudTrail, AWS Config, Zero-trust Network**
- **GitOps, Git**

CERTIFICATE

2024
Software Development Lifecycle

2024
Web Design for Everybody

2025
React Ultimate - Udemy

2025
Research Methods & Academic Writing Skills

2025
Project management

PROFILE

Software Engineer with a solid background in full-stack development, transitioning strongly into Cloud Architecture and DevOps. Highly skilled in designing, deploying, and hardening highly available AWS cloud environments. Driven by a passion for Infrastructure as Code (Terraform), container orchestration (Docker/Kubernetes), and building scalable, cost-aware, zero-trust infrastructure. Seeking a dynamic role to leverage my system thinking and bridge the gap between application development and resilient cloud operations.

EXPERIENCE & PROJECTS

FPT Software

Front End Developer Intern 1/2025 - 5/2025

- Developed user interfaces for applications.
- Tracked and updated progress to ensure timely project completion.
- Identified and resolved bugs during the deployment phase.

FLearning - Online Learning Platform

Leader 5/2025 - 9/2025

- **Technologies:**
  - Core: React.js, JavaScript (ES6+), Redux Toolkit, React Router
  - API & Real-time: Axios, Socket.IO Client
  - Styling & UI: SCSS, CSS Modules, Chart.js, React Icons
  - DevOps & Tools: GitHub Actions (CI/CD), Vercel
- **Responsibilities:**
  - Developed and maintained reusable UI components for a responsive user experience across the application.
  - Engineered key user-facing features, including course browsing, shopping cart, checkout process, and user authentication.
  - Built a comprehensive admin dashboard for managing courses, users, and discounts, including CRUD functionalities and data visualization with Chart.js.
  - Integrated RESTful APIs using Axios for seamless data fetching and state management with Redux Toolkit.
  - Implemented real-time features, such as chat and notifications, using Socket.IO to enhance user engagement.
- **Github: https://github.com/orgs/FLearningg**

VIC SPORT - Online Sport Booking

Leader 9/2025 - 12/2025

Technologies:

- Core: React, TypeScript, Vite
- UI: Ant Design, Bootstrap, SASS
- State Management & API: Axios
- Routing: React Router
- Real-time: Socket.IO
- Other: Google Maps API, Google OAuth, Lottie for animations, ExcelJS, React-CSV for data handling.

Responsibilities:

- Developed and maintained a responsive and user-friendly interface for a sports-focused web application using React, TypeScript, and Ant Design.
- Implemented client-side routing and navigation using React Router.

SOFT SKILLS

Team Working
Time Management
Communication Skill
Critical Thinking
Team Leading

LANGUAGES

English: Professional Working Proficiency (TOEIC 750+)
Vietnamese: Native

- Integrated with backend services and RESTful APIs using Axios for data fetching and manipulation.
- Developed real-time features, such as chat and notifications, using Socket.IO.
- Implemented internationalization to support multiple languages.
- Created data visualizations and dashboards using Ant Design Plots.
- Integrated Google Maps for location-based features and Google OAuth for user authentication.

GZMart - Direct Wholesale & Retail Guangzhou Fashion!
Member 1/2026 - 6/2026
Technologies:
- Core: React 18, JavaScript (JSX), Vite
- UI: Ant Design 6, Bootstrap 5, SASS, Tailwind CSS, Framer Motion, Lucide React
- State Management & API: Redux Toolkit, Redux Persist, Axios (JWT interceptors, token refresh)
- Forms & Validation: Formik, Yup
- Routing: React Router v6
- Real-time: Socket.IO Client
- Other: i18next (internationalization), Recharts (data visualization), React Leaflet (maps), Google OAuth, Facebook OAuth, @dnd-kit (drag-and-drop), Gemini AI / Google Vision / OpenAI (AI features), React Hot Toast, React Toastify

Responsibilities:
- Developed and maintained a responsive, multi-role interface (Buyer, Seller ERP, Admin) for an e-commerce web application using React and Ant Design.
- Implemented client-side routing and navigation using React Router v6 with lazy loading, role-based PrivateRoute/PublicRoute guards, and three distinct layout systems (MainLayout, ERPLayout, AdminLayout).
- Implemented internationalization to support multiple languages using i18next and react-i18next.
- Built a Seller ERP module covering purchase orders, inventory management, landed cost, flash sales, vouchers, promotions (combo, add-on, shop program), and returns (RMA).
- Implemented drag-and-drop interfaces using @dnd-kit for product and variant management.

XBrain
DevOps/CloudOps Intern 4/2026 - Present
- **Architecture & Security:** Designed and provisioned a highly available 3-tier architecture across multiple Availability Zones. Hardened security layers using VPC, strict Security Groups, IAM Least Privilege, and Data-at-rest encryption (AWS KMS).
- **Infrastructure as Code (IaC):** Utilized **Terraform** to automate the provisioning of AWS resources (VPC, EC2, S3, IAM Roles), managing infrastructure state and eliminating configuration drift.
- **Containerization & Orchestration:** Packaged applications using **Docker** and deployed them onto **Kubernetes (Minikube/EKS)** clusters to ensure seamless scalability and isolated workloads.
- **Cost & Operations:** Implemented automated Cost Guard using AWS Lambda and EventBridge to detect and shut down idle resources. Configured CloudWatch dashboards for real-time monitoring and alerting.
- **AI Integration:** Integrated **Amazon Bedrock** (Knowledge Base, RAG pipelines) to add Generative AI capabilities directly into the application backend.

ACHIEVEMENT

Top 100 Students Honors List, FPT University (Spring 2024) 2024

Level English ~ TOEIC 750+
